CHAPTER 1 INTRODUCTION ----- 1

1.1	Research Problem -----	2
1.1.1	Study area-----	4
1.1.2	Objectives-----	4
1.2	Geology of Himalaya -----	5
1.2.1	Geology of Indus Tsangpo Suture Zone, Ladakh Himalaya -----	7
1.2.3	Structural setting-----	13
1.3	Quaternary Geology of Indus Tsangpo Suture Zone -----	

CHAPTER 2 METHODOLOGY -----18

2.1	Field Investigations-----	19
2.2	Geomorphic studies -----	19
2.3	Lithofacies analysis of terrace sequences -----	22
2.4	Chronology -----	22
2.4.1	Introduction to Luminescence Dating and Principle -----	23
2.4.2	Optical bleaching and its relation with geological processes -----	27
2.4.3	Optically Stimulated Luminescence and age evaluation-----	29
2.4.3.1	Environmental dose rate determination -----	30
2.4.3.2	Palaeodose estimation-----	31

2.4.4	Laboratory procedures -----	33
2.4.5	Instrumentation and OSL measurement-----	35
2.4.6	Problems in samples from Ladakh -----	37
2.5	Environmental Magnetic Parameters -----	40
2.6	X-ray Diffraction for clay minerals -----	
CHAPTER 3 GEOMORPHOLOGY -----		46
3.1	Geomorphology-----	47
3.2	River valley profile and geomorphic index -----	48
	Stream length gradient (SL) index -----	51
3.3	Landforms -----	53
3.4.2	Segment-II -----	56
3.4.3	Segment-III -----	65
3.4.4	Segment-IV -----	73
3.5	Sand ramps -----	
CHAPTER 4 SEDIMENTOLOGY -----		94
4.1	Introduction-----	95
4.2	Sedimentary architecture of Indus River and associated sediments---	96
4.2.1	Gravel Facies -----	96
4.2.1.1	Gh (Clast supported horizontal stratified imbricated gravels) -----	96
4.2.1.2	Gcm (Clast supported massive gravels) -----	96
4.2.1.3	Gmg (matrix supported graded gravels)-----	98
4.2.1.4	Gmm (matrix supported massive gravels) -----	99
4.2.1.5	Gp (clast supported planar cross bedded gravels)-----	99
4.2.2	Sand Facies -----	100

4.2.2.1	Sh (Horizontally laminated sand) -----	100
4.2.2.2	Sp (planar cross bedded sand) -----	101
4.3	Lithofacies Associations-----	103
4.3.1	Channel bound lithofacies association-----	103
4.3.2	Fan bound lithofacies association -----	103
4.4	Sedimentary architecture of Sand ramps -----	104
4.4.1	Parallel laminated medium sand-----	104
4.4.2	Poorly sorted coarse sand-----	106
	Parallel bedded angular gravel-----	107
4.4.4	Parallel laminated clayey silt-----	108
4.4.6	Environmental magnetism, SEM and RAMAN spectroscopy -----	110
4.4.7	Clay minerals and weathering patterns -----	112
4.5	Sedimentary style and depositional patterns of Indus River system	114
4.5.1	Segment I -----	115
4.5.2	Segment II -----	115
4.6	Sedimentary style and depositional patterns of Sand Ramps in Leh valley -----	
	CHAPTER 5 PALEO-HYDROLOGY-----	166
5.1	Introduction-----	167
5.2	Theory of Paleo-Hydrology calculation-----	169
5.3	Gravel geometry and Empirical formulae-----	169
5.4	Discharge calculation -----	174
5.5	Paleo-discharge and past climate-----	
	CHAPTER 6 DISCUSSION AND CONCLUSION -----	185
6.1	Indus River System-----	186

6.2	Role of Climate and Tectonics-----	188
6.2.1	Indus river sedimentation and palaeoclimate-----	188
6.2.2	Morphometric indices, channel incision and their possible causes--	193
6.3	Spatial variations bedrock incision rates -----	198
6.4	Sand ramps -----	203
6.5	Conclusions-----	
CHAPTER 7 REFERENCES-----		214
APPENDIX-----		243
