

## Table of Contents

Acknowledgements.....	ii
Declaration .....	iii
Thesis Completion Certificate .....	iv
Table of Contents.....	vi
Executive Summary .....	ix
List of Symbols .....	xii
List of Abbreviations.....	xiii
List of Equations .....	xv
List of Figures .....	xvi
List of Tables.....	xviii
Chapter 1 Introduction .....	1
1.1 Background.....	1
1.2 Need for the study.....	3
1.2.1 Rise in demand for energy.....	3
1.2.2 Production losses case studies .....	5
1.2.3 How production opportunity is lost.....	6
1.2.4 The well lift curve and back allocation factor .....	8
1.2.5 Production dynamics factor .....	9
1.2.6 The mathematical methodology factor .....	11
1.2.7 The production performance history factor .....	11
1.3 The business problem .....	12
1.4 The research objective .....	12
1.5 The research plan and simulation approach .....	13
1.6 Structure of thesis .....	14
1.7 Chapter conclusions.....	15
Chapter 2 Literature review .....	17
2.1 Barriers and achievements timeline.....	17
2.2 Literature review models and limitations .....	18
2.2.1 Integer, linear and mixed integer programming .....	19
2.2.2 Quadratic mixed integer coupled with numerical simulator .....	19
2.2.3 Virtual metering, real-time data and DCS .....	20
2.2.4 Geochemistry based back allocation for optimization .....	20
2.2.5 Integer programming with planned maintenance optimization .....	20
2.2.6 Specialized fit for purpose simulators solutions.....	21

2.3	Literature review in timeline .....	21
2.4	Underpinning theory.....	27
2.5	The research question .....	28
2.6	Chapter conclusions.....	28
Chapter 3 Research Design .....		31
3.1	The research problem .....	31
3.2	The business problem .....	31
3.3	The research question .....	31
3.4	The research objective .....	31
3.5	The research methodology.....	32
3.6	Objective 1 – Instrument development.....	33
3.6.1	Conducting the questionnaire .....	35
3.7	Objective 2 – Hypothesis testing and model development.....	36
3.7.1	Model development - Data collection .....	37
3.7.2	Model development guidelines for objective 2 .....	38
3.7.3	The simulation model and constraints.....	39
3.8	Chapter conclusions.....	47
Chapter 4 Findings and Analysis .....		48
4.1	Findings of objective 1 .....	48
4.2	Findings of objective 2 - Wells trends.....	53
4.3	Findings of objective 2 – Gaps of production plans and actuals .....	54
4.4	Findings of objective 2 - Simulation models.....	57
4.4.1	Simulation run for validation of the model number 1 .....	57
4.4.2	Simulation forecast for six months – model number 1.....	59
4.4.3	Simulation forecast for fourteen months - model number 1.....	60
4.4.4	Simulation forecast for one month – model number 2 .....	61
4.4.5	Simulation forecast for twelve months – model number 2.....	62
4.4.6	Simulation forecast two years – model number 2 .....	63
4.5	Summary of simulation versus exiting model results.....	64
4.6	Chapter conclusions.....	65
Chapter 5 Conclusions and Recommendation .....		67
5.1	Enhancement over time based on losses – model 1.....	67
5.2	Enhancement over time based on losses – model 2.....	69
5.3	Decline models analysis .....	70
5.4	Discussions .....	71

5.4.1	Example well number 55.....	72
5.4.2	Example well number 50.....	74
5.5	Recommendations .....	75
5.6	The theoretical premise and research motive .....	75
5.7	Contribution to the literature and body of knowledge.....	77
5.8	Research limitations and future studies.....	78
5.9	Chapter summary and highlights.....	79
	References .....	81
	Appendices.....	90
	Biography.....	138
