

List of Figures

1.1	Cloud Computing Front End and Back End	6.
1.2	Cloud Computing Characteristics	9.
1.3	Denial of Service attack process	13.
1.4	DDoS attack using Botnet nodes	14.
1.5	Distributed Denial of Service attack process	15.
1.6	LOIC attack process	18.
1.7	XOIC attack process	19.
1.8	DDoSIM attack process	20.
1.9	Slowloris attack process	20.
1.10	Pyloris attack process	21.
1.11	RUDY attack process	21.
1.12	HDoS attack process	22.
1.13	Spam Email containing payload	23.
1.14	Malware propagation process	24.
1.15	Crypto Ransomware Data Encryption	25.
1.16	Locker Ransomware System Lockout	26.
1.17	Encryption and Decryption process	27.
1.18	Classification of Algorithms	28.
1.19	Symmetric Algorithms	30.
1.20	Research Methodology	32.
2.1	DDoS Attacks on Clouds	35.
2.2	DDoS Attack Classification	46.
3.1	Respondents work responsibilities	53.
3.2	Impact of DDoS Attack on organizations	53.
3.3	Ability to deal with DDoS Attacks	54.
3.4	Consequences of DDoS Attacks	54.
3.5	Barriers preventing DDoS mitigation implementation	55.
3.6	Top Rated Cyber Threats	55.
3.7	Downtimes resulted due to DDoS attacks	56.
3.8	Frequency of DDoS checks performed	56.
3.9	Mitigation activities during DDoS attacks	57.
3.10	Factors important during DDoS attacks	57.
3.11	DDoS attacks on data center devices	58.
3.12	Traffic blocking by ISP	59.
3.13	Reflection DDoS attack process	64.
4.1	Malware Detection Environments	68.
4.2	Malware Detection Process	70.
4.3	Malware Detection as a Service Results	74.
5.1	Encrypting text file to send to Cloud	78.
5.2	Computational Cost for Encryption	79.
5.3	Computational Cost for Decryption	79.
5.4	Encoding: File Size v/s Computing Cost	80.
6.1	Single Tier Architecture Design	87.
6.2	Raw DDoS Attack Logs	88.
6.3	Single Tier Architecture RUM parameters	89.

6.4	Three Tier Architecture Design Model	89.
6.5	Three Tier Architecture Design	90.
6.6	Three Tier Architecture – Network Defense Tier	91.
6.7	Three Tier Architecture – Application Defense Tier	93.
6.8	Three Tier Architecture – Access Tier	94.
6.9	Three Tier Network Architecture attack logs	95.
7.1	Single Tier Architecture Attack Results	97.
7.2	Three Tier Network Architecture Attack Results	98.
7.3	ICMP response comparison results	98.
7.4	Page Load response comparison results	99.
7.5	Browser Throughput comparison results	99.
7.6	Real User Monitoring – Application Server Response	100.
7.7	Real User Monitoring – SaaS Availability Threshold	105.
7.8	Device trends during DDoS attacks	106.
