

## LIST OF TABLES

Table	Title	Page No.
1.1	Sensor parameters of various SAR systems .....	12
2.1	Tsunami generation risk bulletin (NOAA Forecast manual, 2011).....	27
3.1	Estimated results for Tsunami fault parameters on logarithmic scale with reference to earthquake magnitude.....	40
3.2	Result for wavelength, propagation length, wave number and angular velocity of the tsunami waves in deep, intermediate and shallow.....	45
3.3	Tabulated results for tsunami Eigen functions such as orbital velocity along the direction of propagation ( $x$ ), vertical ( $z$ ) and resultant ( $r$ ) for deep, intermediate and shallow water regions.....	50
3.4	Tabulated results for tsunami Eigen functions such as orbital acceleration in the direction of propagation, vertical displaced direction and resultant direction for deep, intermediate and shallow water regions.....	55
3.5	Calculated results for the tsunami wave potential functions in deep, intermediate and shallow water regions.....	59
3.6	Celerity variations with respect to the direction of propagation in deep, intermediate and shallow water regions.....	59
4.1	Imaging mode characteristics of RADARSAT-2.....	62
