

CHAPTER 7

7.1 SUMMERY AND IDEAS WITH INDICATION FOR FUTURE WORK

1. It is time for Indian Public Sector to introduce holistic bid evaluation framework which is quantitative in nature, and where “lowest price” is not the only criteria.
2. Study opens up door to take up future research to validate the model for change in PPI due to CAI framework against conventional framework and by using CAI framework.
3. A framework can be validated for other core sectors in India as Infrastructure, Aviation, Power sector, Rail sector etc.

7.2 LIMITATION OF STUDY

- 1 Persons from Public sector were apprehensive for providing true feedback on the real troubles of the system.
- 2 Responses taken from individuals may vary depending upon time, mood, type of functionality and hence may affect feedback data at various interval and in various geographies.
- 3 As large projects cannot be tested within study time span, hence model testing is kept for future study work.
