End-Semester Examination 2021

Program/course : BA (Hons.) Economics Semester : III
Subject : Statistical Methods for Economics Max. Marks : 100
Code : ECON2020 Duration : 3 Hrs
No. of page/s : 4

SECTION A

Q1	Answer all the questions. Each Question will carry 2 Marks	10Qx2 M=20 Marks	CO
i.	In the weighted average: $\bar{x}_w = \sum_i w_i x_i$ w represents the weights, which must sum to _____. (a) 1 (b) 10 (c) 100 (d) 2i	[2]	CO1
ii.	Dispersion is the scatteredness of the data series around its _____. (a) average (b) median (c) mode (d) coefficient	[2]	CO1
iii.	_____ is independent of origin, but not of scale (a) Standard Deviation (b) Mean Deviation (c) Median (d) Mean	[2]	CO1
iv.	Standard score gives us the number of standard deviations, a particular observation lies below or above the _____. (a) Mean (b) Standard Deviation (c) Mean Deviation (d) Median	[2]	CO1
v.	Two events are dependent if the outcome or occurrence of the first _____ the outcome or occurrence of the second. (a) affects (b) does not affects (c) is greater than (d) is less than	[2]	CO1
vi.	Spin a spinner numbered 1 to 7, and toss a coin. What is the probability of getting an odd number on the spinner and a tail on the coin? (a) 2/7 (b) 2/5 (c) 2/3 (d) 2/9		CO1

vii.	The conditional probability of E given F, denoted by _____. (a) $\Pr(E F)$ (b) $\Pr(F E)$ (c) $\Pr(E.F)$ (d) $\Pr(E-F)$	[2]	CO1																									
viii.	Susan took two tests. The probability of her passing both tests is 0.6. The probability of her passing the first test is 0.8. What is the probability of her passing the second test given that she has passed the first test? (a) 0.75 (b) 0.65 (c) 0.55 (d) 0.45	[2]	CO1																									
ix.	A _____ random variable can take on any value in some interval of values. (a) continuous (b) discrete (c) mixed (d) correlated	[2]	CO1																									
x.	Two random variables X and Y are statistically independent if and only if _____. (a) $f(x, y) = f(x)f(y)$ (b) $f(x, y) = f(x)/f(y)$ (c) $f(x, y) = f(x) + f(y)$ (d) $f(x, y) = f(x) - f(y)$	[2]	CO1																									
Section B Attempt all the questions. Each question carries equal marks.		4Qx5 M= 20 Marks	CO																									
Q2	The selling prices (in \$1,000) of a new popular compact automobile are given here. <table border="1" style="margin: 10px auto; border-collapse: collapse;"><tbody><tr><td>26.6</td><td>25.3</td><td>23.8</td><td>24.0</td><td>27.5</td></tr><tr><td>21.1</td><td>25.9</td><td>22.6</td><td>23.8</td><td>25.1</td></tr><tr><td>22.6</td><td>27.5</td><td>26.8</td><td>23.4</td><td>27.5</td></tr><tr><td>20.8</td><td>20.4</td><td>22.4</td><td>27.5</td><td>23.7</td></tr><tr><td>22.2</td><td>23.8</td><td>23.2</td><td>28.7</td><td>27.5</td></tr></tbody></table> Define the modal selling price and calculate the modal selling price from the above data set.	26.6	25.3	23.8	24.0	27.5	21.1	25.9	22.6	23.8	25.1	22.6	27.5	26.8	23.4	27.5	20.8	20.4	22.4	27.5	23.7	22.2	23.8	23.2	28.7	27.5	[5]	CO2
26.6	25.3	23.8	24.0	27.5																								
21.1	25.9	22.6	23.8	25.1																								
22.6	27.5	26.8	23.4	27.5																								
20.8	20.4	22.4	27.5	23.7																								
22.2	23.8	23.2	28.7	27.5																								
Q3	Age of 10 subjects from a population of 169 subjects are given below: <table border="1" style="margin: 10px auto; border-collapse: collapse;"><thead><tr><th>X₁</th><th>X₂</th><th>X₃</th><th>X₄</th><th>X₅</th><th>X₆</th><th>X₇</th><th>X₈</th><th>X₉</th><th>X₁₀</th></tr></thead><tbody><tr><td>42</td><td>28</td><td>28</td><td>61</td><td>31</td><td>23</td><td>50</td><td>34</td><td>32</td><td>37</td></tr></tbody></table> Calculate range and coefficient of range.	X ₁	X ₂	X ₃	X ₄	X ₅	X ₆	X ₇	X ₈	X ₉	X ₁₀	42	28	28	61	31	23	50	34	32	37	[5]	CO2					
X ₁	X ₂	X ₃	X ₄	X ₅	X ₆	X ₇	X ₈	X ₉	X ₁₀																			
42	28	28	61	31	23	50	34	32	37																			
Q4	Find mean absolute deviation of confinement after delivery in the following series: <table border="1" style="margin: 10px auto; border-collapse: collapse;"><tbody><tr><td>Days of Confinement</td><td>6</td><td>7</td><td>8</td><td>9</td><td>10</td></tr><tr><td>No. of Patients</td><td>5</td><td>4</td><td>4</td><td>3</td><td>2</td></tr></tbody></table>	Days of Confinement	6	7	8	9	10	No. of Patients	5	4	4	3	2	[5]	CO2													
Days of Confinement	6	7	8	9	10																							
No. of Patients	5	4	4	3	2																							

Q5	Weights of CEOs of 265 Energy Enterprises are given below. Calculate standard deviation of their weights.												[5]	CO2	
	Class Interval of weights	90-99	100-109	110-119	120-129	130-139	140-149	150-159	160-169	170-179	180-189	190-199			200-2009
	Frequency	1	1	9	30	42	66	47	39	15	11	1			3

Section C
Attempt all the questions. Each question carries equal marks.

3Qx10
M=30
Marks

Q7.	<p>a) A single card is chosen at random from a standard pack of 52 playing cards. What is the probability of choosing a king or a club?</p> <p>b) A school survey found that 7 out of 30 students walk to school. If four students are selected at random without replacement, what is the probability that all four walk to school?</p>	[10]	CO3
-----	--	------	-----

Q8.	<p>a) On New year’s Eve, the probability of a person having a car accident is 0.09. The probability of a person driving while intoxicated is 0.32 and probability of a person having a car accident while intoxicated is 0.15. What is the probability of a person driving while intoxicated or having a car accident?</p> <p>b) A nationwide survey showed that 65% of all children in the United States dislike eating vegetables. If 4 children are chosen at random, what is the probability that all 4 dislike eating vegetables?</p>	[10]	CO3
-----	--	------	-----

Q9	<p>Suppose that Bob is late one day. His boss wishes to estimate the probability that he traveled to work that day by car. He does not know which mode of transportation Bob usually uses, so he gives a prior probability of 1 in 3 to each of the three possibilities.</p> <table style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left; border-bottom: 1px solid black;">Mode of transport</th> <th style="text-align: left; border-bottom: 1px solid black;">Probability that Bob is late</th> </tr> </thead> <tbody> <tr> <td>Car</td> <td>50%</td> </tr> <tr> <td>Bus</td> <td>20%</td> </tr> <tr> <td>Train</td> <td>1%</td> </tr> <tr> <td>Find</td> <td></td> </tr> </tbody> </table> <hr/> <p>From the given information calculate P(late) and P(car late).</p> <p style="text-align: center;">OR</p> <p>Explain and analyze the χ^2 (Chi-Square) distribution and discuss its various properties.</p>	Mode of transport	Probability that Bob is late	Car	50%	Bus	20%	Train	1%	Find		[10]	CO3
Mode of transport	Probability that Bob is late												
Car	50%												
Bus	20%												
Train	1%
