

Name: Enrolment No:	
--------------------------------------	--

UNIVERSITY OF PETROLEUM AND ENERGY STUDIES End Semester Examination, December 2022	
Course: Industrial Electrical Utility System Program: B Tech (Electrical Engineering) Course Code: EPEG 4012 Instructions:	Semester: 7th Time : 03 hrs. Max. Marks: 100

SECTION A (5Qx4M=20Marks)			
--	--	--	--

S. No.		Marks	CO
Q 1	What are the various application of PLC ?	4	CO4
Q 2	Draw the symbol for the following component/equipment. <ul style="list-style-type: none"> • Current transformer • Fuse • DPDT switch Isolator	4	CO1
Q 3	Give the environmental benefits of digital substation.	4	CO2
Q 4	How poor power factor can lead stress on generating station?	4	CO1
Q 5	Why earthing is required and how it can protect?	4	CO2

SECTION B (4Qx10M= 40 Marks)			
---	--	--	--

Q 6	Discuss inverse square law & cosine law of Illumination.	10	CO3
Q 7	Design the ladder diagram for the below figure. Also define the output and write the Boolean expression. <div style="border: 2px solid blue; padding: 10px; margin: 10px 0;">  </div>	10	CO4
Q 8	Sketch the MCB internal circuit and differentiate the functioning of coil and strip placed in MCB.	10	CO3

Q 9	Present the operating principle of RCCB and its practical applications.	10	CO2
SECTION-C (2Qx20M=40 Marks)			
Q 10	Design the cable sizing considering the following constraints. (a) Supply type (single phase/3-phase/DC) (b) Full load current in Ampere (c) Full load power factor (d) Cable conductor material (Copper/Aluminium) (e) Derating factor (f) Maximum permissible voltage drop	20	CO3
Q 11	Present the main concepts which are necessary for the development and realization of the automation system as per IEC 61850. OR Discuss how Open Systems Interconnection (OSI) model maintains the framework for inter-device data communications.	20	CO4
